

John Lennon's Glasses

By Jim Ocean with Kathy Ocean

John Lennon's Glasses is a story of personal transformation as a washed-up singer-songwriter is pulled back from the brink of despair by a pair of mysterious glasses that summon the spirit of John Lennon from the afterlife. Lennon and the main character go on a surreal cross-country and across-the-universe adventure, encountering a host of legendary deceased rock stars as they battle a cosmic threat that wants to extinguish all music from the earth. It's a wild ride through rock 'n' roll history and the music business, rather like *The Hitchhiker's Guide to the Galaxy* meets *On the Road*; and it comes with not one, but two companion collections of original music: the *Pop Tunes for Mystics* LP and "The John Lennon's Glasses Music Collection".

"Sure, Lennon. All you need is love when you're rich and famous and adored by millions of fans. The truth is . . . love distracts you. It sends you down blind paths. It gives you a mission, then leaves you stranded on a beach with unrealized dreams and a broken heart. The truth is, Lennon . . . love can get you shot! You certainly learned that the hard way. All I needed . . . was rent."
